

M200 Multi Button Secondary Control System

Custom solution designed with flexibility in mind

The M200 Multi Button operates up to five secondary functions via individual buttons or switches. These can be placed at various locations within the vehicle in order to suit the driver's needs. Available for both CANbus and relay vehicles.

Indicators - lights (dip/main & flash) - horn - front wipers (intermittent, low & high speed) - front washers - rear washer & wiper

- Hard wired
- CANbus “easy fit” or relay based vehicles
- Up to five buttons, each with a single function
- Can be used with various switches
